DUBLIN, IRELAND

Jason Scott

Study Abroad Scholars Scholarship Recipient

Jason’s Major: Psychology and Criminal Justice
Program: Ireland, Dublin USIT Summer

How did you hear about the scholarship? I originally read about the scholarship online. I was searching scholarships for studying abroad and summer studies more generally and I came across the SA Scholars application.

How did the scholarship help you study abroad? The scholarship was a tremendous help for me while abroad. I typically work more during the summer than during the school year, so I knew I would be burdened with limited financial resources while abroad. The Study Abroad Scholars scholarship provided me the opportunity to explore more around Ireland and participate in events and outings that I might not have been able to participate in without the scholarship.

In addition to your scholarship, what other resources did you use to fund your study abroad experience? Since I was in high school I have worked at least one job. For the two years leading up to my summer abroad, I was working around 30 hours a week between two jobs. I had saved up quite a bit of money in anticipation of studying abroad, and I had researched my specific trip when I was a freshman to get an idea of how much money I should save for the trip. Additionally, I was fortunate enough to receive a private scholarship that helped cover some of my smaller costs.

“The scholarship was a tremendous help for me while abroad.”
